AI

Aloha, ! How's life treating you in paradise?

*please give me feedback on the tense of the sentence.*

I'm fine, thanks. ~~Please give me the feedback. The sentence, the tense of my sentence. And I hope to improve my speaking skills in English, speaking more naturally. And I hope to choose more correct word, such a verb and the sentence structure. And this is my study goal.~~

*I hope to improve my English speaking skills and speak more naturally.*

AI *I also hope to choose more correct words, such as verbs and sentence structures.*

Do you mean, "I'm fine, thanks. ~~Please give me feedback on the tense of my sentence.~~ *I hope to improve my speaking skills in English and speak more naturally.* *I also want to choose the correct words, like verbs and sentence structure.* This is my study goal."?

Great! Let's start with a simple question: What did you do yesterday?

*went*

*I have a*

Yesterday I ~~go~~ to work because ~~I'm~~ *I have a* master degree. Currently I'm pursuing master degree at Sungkyunkwan University. I major in electronic engineering and I'm passionate ~~in~~ *about* the automated system including autonomous driving.

AI

Do you mean, "Yesterday I went to work because I'm pursuing a master's degree. Currently, I'm studying for a master's degree at Sungkyunkwan University. I major in electronic engineering and I'm passionate about automated systems, including autonomous driving."?

That's impressive! What do you enjoy most about your studies?

That's a very interesting question. Actually, I like all the categories in the technological field. But most of ~~them~~<sup>all</sup>, I like ~~the~~<sup>all</sup> automated systems. It's my favorite field.

**AI**

Do you mean, "That's a very interesting question. Actually, I like all the categories in the technological field. But most of all, I like automated systems. It's my favorite field."?

Awesome! What do you find most exciting about automated systems?

It can be operated without the person's control. And it can make us more comfortable and cozy. That's my favorite thing. I hope our world can be converted more digitalized.

**AI**

Do you mean, "They can operate without a person's control and make our lives more comfortable and convenient. That's my favorite thing. I hope our world becomes more digitalized."?

Great thoughts! How do you think automated systems will change daily life in the future?

**With Dwayne**

20.08.2024 | 03:08:19 UTC

In the future, the automatic system is everywhere, but people cannot realize it because like practical application, it is running automatic system, but running by AI then we couldn't realize about that. Before the passionate AI, maybe practical application can running by the most of original people, then answer our sentence, but it isn't now.

**AI**

Do you mean, "In the future, automated systems will be everywhere, but people might not realize it because they will be running automatically by AI. Before advanced AI, practical applications were operated by humans. Now, many tasks are handled by AI."?

Interesting! What specific automated system are you most excited to see in the future?

Actually this is my personal field. I like writing some things in my physical notebook. But I have something special. my writing things must be paralyzed and keep the words correctly. Then if I write something wrong, then I erase all my that page then I don't like that page the erase then the digitalized writing system is my favorite specific favorite things

**AI**

Do you mean, "Actually, this is my personal preference. I like writing in my physical notebook. But I have a special habit: my writing must be perfect and neat. If I make a mistake, I erase the entire page because I don't like seeing eraser marks. That's why digital writing systems are my favorite."?

That's fascinating! Do you use any digital tools for your notes now?

**With Dwayne**

20.08.2024 | 03:08:19 UTC

Yes, I like iPad. I have iPad and Galaxy Tab. And even I have digital pen. It works very, very special because when I'm writing with this pen in my physical notebook, then the words will translate the digital vectorizing and it can be seen in my computer monitor and can control the single vectorizing the word. Then I can move and just erase something one word but it can't control the digital page but the physical notebook I can't control on them then in the future I hope to control in my physical notebook too

**AI**

Do you mean, "Yes, I like my iPad. I have both an iPad and a Galaxy Tab. I also have a digital pen that works very well. When I write in my physical notebook with this pen, the words are converted into digital vectors and can be seen on my computer monitor. This allows me to move or erase single words digitally, which isn't possible with just the physical notebook. In the future, I hope to control my physical notebook in this way too."?

That's amazing technology! How often do you use your digital tools for studying?

Actually, real study, I just write as fast as, then I using just analog pen and analog paper. I write down my lectures and clarify my lecture class notebook and repeat that same course after the clarifying my class lecture note. And that time I use my digital tools in the clarifying steps.

**AI**

Do you mean, "For real study, I write quickly using an analog pen and paper. I take down my lectures and then clarify my lecture notes. After clarifying my

**With Dwayne**

class lecture notes, I repeat the same course. During this clarification step, I use my digital tools."?

That sounds like a solid method! How do you feel this process helps your understanding?

Repeating the same course can improve my understanding. But it takes most time and sometimes it doesn't matter because all the study doesn't matter in my life then but in for the clarification steps makes me focusing on the whole lecture, whole lecture then it doesn't, not that great for my time, my time perspective.

**AI**

Do you mean, "Repeating the same course can improve my understanding, but it takes a lot of time. Sometimes it's not useful because not all study material is relevant to my life. However, the clarification step helps me focus on the entire lecture, even though it's not great for managing my time."?

I see! How do you balance your study time with other activities?

Actually, I like my tech, I would like to study my major. That's one of my interesting field and I like my major very mostly. Around my friends, very amazed because they doesn't like that they're majored. But I'm very passionate in my majors and I like my technological major and I like this very most and actually studying time and other activities is same things but some special things I using separate time is for my exercising time and have some lunch and dinner. And I, every day I have a breakfast and I like dessert and

**With Dwayne**

20.08.2024 | 03:08:19 UTC

sweet things. And I have, I have something, I have some, I have, I have, I had been spend my time to spend getting around my world.

**AI**

Do you mean, "Actually, I love my tech and studying my major. It's one of my interests, and I'm very passionate about it. My friends are amazed because they don't like their majors as much. For me, studying and other activities are the same thing. However, I separate time for exercising and meals like lunch and dinner. Every day I have breakfast, enjoy dessert and sweet things. I've also spent time exploring the world."?

That's wonderful! What kind of desserts do you enjoy most?

Oh, that's my one of the my fashionating things. Actually, I like something drinks or pudding, you know, pudding. And it's very tangible dessert, but it's very sweet and can be flexible features and with it makes using eggs and something cream. Some pudding can make, add chocolate or something sweet else such as custard or malcha. Sometimes it can be made some fruit such like grapefruit and you know know jamon I don't know how can I share how can I speak jamon in English but that's one of the ingredients of the pudding

**AI**

Do you mean, "Oh, that's one of my favorite things. I like desserts like drinks or pudding. Pudding is a sweet and flexible dessert made with eggs and cream. Some puddings include chocolate or other sweet flavors like custard or matcha. Sometimes they are made with fruits such as grapefruit and another fruit called 'jamon' in Korean."?

Yum! Have you ever tried making pudding yourself?

Sure, actually I like the custard pudding most. Then I have been, I had been making pudding myself, but sometimes it works very well and my family very surprised about that. Oh, how did you make that? But sometimes, such this day, it doesn't make so well. I don't know why.

**AI**

Do you mean, "Sure, I like custard pudding the most. I have made pudding myself before. Sometimes it turns out very well and my family is surprised, asking how I made it. But other times, it doesn't turn out so well and I'm not sure why."?

That's great! What do you think makes the difference between a good and a bad batch?

Actually, the eggs was in best case. The eggs are not that cool and the caramel sauce is make best because it boiled best time and best fluid but in bad case caramel sauce is boiled much more than best case and or the eggs are too cold to make custard and that's maybe can cause something wrong

**AI**

Do you mean, "Actually, the eggs are important. In the best case, the eggs are not too cold and the caramel sauce is boiled for just the right amount of time to be perfect. In a bad case, if the caramel sauce is overboiled or if the eggs are too cold, it can cause problems."?

That makes sense! Do you have any tips for making perfect custard pudding?

Actually, I recommend if you want to take perfect custard pudding, then just buy it. Actually, the perfect custard pudding can buy some around the cafe and I just bought them too.

**AI**

Do you mean, "Actually, if you want perfect custard pudding, I recommend just buying it. You can find perfect custard pudding at some cafes. I buy them too."?

That's practical advice! Do you have a favorite cafe where you get your custard pudding?

sure and um wow wow wow sometimes this day i bought custard pudding third third time a week. The cream or a cafe is my favorite favorite cafe around my and I have to go now but I hope to continue this topic

**AI**

Do you mean, "Sure, wow! Sometimes I buy custard pudding three times a week. The Cream or a Cafe is my favorite cafe nearby. I have to go now, but I hope to continue this topic."?

Great! Let's chat more about your favorite desserts next time. Have a wonderful day!
